DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 5 and 6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding to claim 5, the claim defines both a method and an apparatus. The claim as a whole is neither a definition of a method nor of an apparatus but is instead a hybrid of the two; it, therefore, does not define the invention in the manner contemplated by the second sentence of 35 U.S.C. Sec. 112 (see *In re Oakley*, 1935 C.D. 198, 454 O.G. 536, 73 F.2d 934, 24 USPQ 75).

Allowable Subject Matter

3. Claims 1-4 are allowed.
4. Claims 5 and 6 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
5. The following is an examiner's statement of reasons for allowance: The prior art of record, US Patent 6,028,860, discloses a method and an apparatus for prioritize virtual connection transmission comprising a tree-based topology network having a root node and a plurality of leaf nodes. However, the prior art of record fails to teach or make obvious the step of or means for **"storing for each node of said network, other than said leaf nodes, a pointer to whichever of its two adjacent downstream**

Art Unit: 2663

nodes effectively points to a leaf node whose associated circuit currently has highest transmission priority, thereby providing said root node with a pointer to the circuit currently having highest transmission priority”, when the storing is considered within the specific structure of the method recited in claim 1. The prior art of record fails to teach or make obvious the step of or means for **“storing, for each of said 2^N leaf nodes of said network, first information representative of priority of transmission of a packet that may be awaiting transmission from an associated communication port over said serialized data path”,** when the storing is considered within the specific structure of the method recited in claim 3 or the device recited in claim 5.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
